

Tennessee Appalachian Center for Higher Education (TnACHE) 2011-2016

Investing in students so they pursue postsecondary education and succeed in the workforce.

Appalachian Tennessee

TnACHE is a successful postsecondary awareness and access program that encourages Tennessee Appalachian students to complete postsecondary education programs. The focus is on access to and success in a variety of postsecondary opportunities: certificate programs, Tennessee Colleges of Applied Technology, military enlistment, and two- and four-year colleges and universities. High schools in distressed counties in Appalachian Tennessee are targeted. Through low-cost, high-impact competitive grants and site-based technical assistance, TnACHE helps increase high school graduation rates, postsecondary enrollment rates, and establishes community-wide infrastructures of school support to provide all students and families with information about and access to postsecondary education.

29 Schools Served

35,675 Students Served

82.6%
First Generation
College Students
